## OFERTA 01

RESEARCH GRANT FOR PHD STUDENT  
AVAILABLE @ ISISE-UC

INSTITUTE FOR SUSTAINABILITY AND INNOVATION  
IN STRUCTURAL ENGINEERING DEPARTAMENTO DE  
ENGENHARIA CIVIL DA UNIVERSIDADE DE COIMBRA | POLO  
II

PROJECT:  
Development of a New Modular Construction System

POSITION 01:  
ARCHITECT. Will work on the preliminary definition of the constructive system, both from the point of view of design and standard fulfilment. Will conduct a exhaustive research and analysis of existing systems. Will establish guidelines and performance objectives from different points of view: architectonic, acoustic, energy efficiency, lighting, evacuation, integration of installations, etc. Will develop the system. Will be responsible to present the ideas in a visually appealing way, and to produce the project documents. Should master CAD and BIM technology, office tools, be familiar with the construction industry and be fluent in English. Capable of team work but also able to work independently in an autonomous and proactive way. Must live in Coimbra for the duration of the project.

CONDITIONS: Immediate incorporation. Integration in a multidisciplinary team, in an outstanding Research Centre, within the framework of a financed project.

SUBMISSION: This is a pre-announcement in advance of the call that will be launched soon.  
Interested candidates are encouraged to contact us now (jorge.conde@upm.es, (+34) 680 128 040) for an informal online meeting. Those that contact us will then receive a notification when the call opens.

Research Grant for PhD Student  
available @ ISISE-UC  JOIN US!

## OFERTA 02

CIVIL DA UNIVERSIDADE DE COIMBRA | POLO II

PROJECT:  
Development of a New Modular Construction System

POSITION 02: A  
ARCHITECT. Will work on the performance criteria of the constructive system, both from the point of view of design and standard fulfilment. Will conduct a exhaustive research and analysis of existing systems. Will establish performance objectives from different points of view: architectonic, acoustic, energy efficiency, lighting, evacuation, integration of installations, etc. Will develop the technical parts of the system and act as liaison with experts. Will be responsible to produce the corresponding project documents. Should master CAD and BIM technology, office tools, and other tools necessary for the technical evaluation of the systems. Should be familiar with the construction industry and be fluent in English. Capable of team work but also able to work independently in an autonomous and proactive way. Must live in Coimbra for the duration of the project.

CONDITIONS: Immediate incorporation. Integration in a multidisciplinary team, in an outstanding Research Centre, within the framework of a financed project.
