15 March 2007

"The life is full of encounter and crossroads, of ways and stays, taken steps, simple moments that are worth a world and crucial moments that are worth what is worth simplest of all the memories."

Dear friends:

TOG Journal, like other organizations, wants to tribute to the founders of the Occupational Therapy in this 90 anniversary. By that reason we published two documents so that the reader can obtain an historical vision of our discipline, with high value for the Occupational Therapy, but with a clear vision of promotion of the discipline, of the values that the founders showed in the creation of the National for Society the Promotion of Occupational Therapy (NSPOT) in 1917.

From day 15 of March in www.revistatog.com you will be able to accede to all the contents.

In addition thanks to the endorsement to the University of Corunna, Faculty of Sciences of the Health, and the managements made by Mr. Jorge Teijeiro; Mr. Sergio Santos del Riego and Ms. Ines Viana Moldes, we are in possibility of offering, this books translated the English.

This it is a tribute to the founders and all the professionals who we worked in this profession and which we create in the Occupational Therapy since they did it at the beginning of century XX.

In my name and the one of the Coordinator of Monographic the D. Pedro Moruno Miralles, we wished that you like and that it is a document that serves to you.

Greeting.

Dña Nereida Canosa Domínguez.
President APGTO
